

Barry Burns Real World Trading

Course Outline Theme

WorldWideTraders is proud

to announce our

2006 Trading Courses

This three-day course is designed to give traders of all levels a toolbox of low risk/high reward trade setups. These setups can be used for day trading, swing trading, or long-term investing, and used with stock, futures or currencies... and the price is unbelievably low!

Observing every presentation delivered at WorldWideTraders for **8** years, there is no trader more qualified to know what others need to know to excel in the trading business than Barry Burns. In some industries, you need to be a Donald Trump or Steve Wynn to win in their business. In trading, you need well-delivered education and practiced training.

Dr. Burns has invested in more trader education than anyone I know... What I'm good at is grasping the important *new* aspects from mentors and applying them to augment my current trading. But Barry is better at amalgamating the best input from all his trading mentors and subsequently creating his own... simplified ...methods. And, his simplified methods are very good. **I use them!** And, what's more... Barry is very effective at successfully teaching his methods to traders to be smoothly applied for more consistent trading rhythm with enhanced conviction and confidence. **This is what every trader needs!**

Barry has been *the* featured speaker at [World Wide Traders](#) on numerous occasions. World Wide Traders is also known as DayTradersUSA. At their request he created and taught a series of 5 daylong trading courses in 2005 in Costa Mesa, CA. These full day courses were delivered to students every other month from April to October.

Most students are extremely satisfied and still trade with us in our FuturesTalk live trading room.

Attend his new 3-Day course is in America's Destination City: **Las Vegas, April 22-24, 2006**

For those of you not familiar with Barry's teaching style, I have included below the audio and video of recent WorldWideTraders presentations. Scroll down the page to view detail course value.

Join us for this extraordinary 3-day event and see how pros make money in the markets day in and day out. You will learn a methodology for trading that is adaptable to different markets, time frames and personalities. The course is taught by Dr. Barry Burns ("The Jaguar"), of "Jaguar Academy of the Markets."

TOPIC 1: "The Core Methodology"

You will be given a complete trading method. Everything is spelled out very clearly:

- The Rules
- The Filters
- The Entries
- The Exits

The method uses 2 charts with 2 different time frames, a trend indicator, a cycle indicator and a trigger indicator. It is a simple and powerful trend trading approach that not only keeps you on the right side of the market, but gets you in at the right TIME as well.

TOPIC 2: "Trading in all Market Conditions"

Trend trading is favored by many but markets trend only about 20% of the time. The crowds trade trends. Getting in before the crowd requires entering the market before a trend is present. You will learn how to accurately diagnose the market condition at any time and how to identify low risk, high reward entries ahead of the masses.

TOPIC 3: "Active Trading"

We use the same basic setups and technical tools regardless of the time frame we trade. There are some differences however. Technical Analysis in day trading is not as reliable as it is on daily, weekly and monthly charts. However there are "Internal Indicators" that give the day trader an extra edge over those who simply watch price charts. These Internal Indicators are critical for successful day trading and give you an edge over most other traders who don't see this information. Therefore we call them "Invisible Indicators." Ignore them to your own peril! We also use some support/resistance levels for day trading that we do not use in swing trading. Most traders don't have these particular levels on their charts, so they are therefore "invisible" support/resistance.

TOPIC 4: "Longer Term Trading"

We use one extra indicator in trading daily/weekly/monthly charts that we don't use when day trading. There are other issues that must be considered which we don't look at intraday. One of the keys to long-term trading is to FIND the opportunities. There is always a Raging Bull Market and a Raging Bear Market somewhere. When you find one of these markets, it's much easier to make money... just get on board and ride the wave. But how do you find them?

Barry Burns Real World Trading

TOPIC 5: “The Geometry of the Market”

Most traders simply use horizontal support and resistance levels. We use horizontal, diagonal and even vertical support and resistance! You will learn how to:

1. find the levels,
2. plot the levels on the chart,
3. how long to keep the levels on the chart,
4. how to prioritize some levels over others and,
5. exactly what each level means.

TOPIC 6: “Reading Price”

Most traders don't really trade the market. They trade indicators! You must learn to read price bars if you want to really identify what the market is doing. You will learn a simplified Candlestick method for understanding what price is doing and what you can expect in the near future.

Multi-Bar Patterns: You've most likely been exposed to Double Tops, Triangles, Head and Shoulders, etc. These patterns may seem rather subjective, and indeed most people read them incorrectly. You'll be shown clear rules to help you understand many price patterns and an objective way to help you find them.

TOPIC 7: “Momentum”

Technical Analysis is a method for analyzing energy in the market. Many traders are familiar with the concept of the Trend, but a Trend without Momentum is worthless.

You will learn how to analyze momentum, how it relates to trends, and how it relates to cycles. You'll learn how to measure consolidation, stay out of choppy markets, and enter a sideways market in the direction of the breakout before it breaks!

TOPIC 8: “Improving Your Numbers”

Increase the probability that your trade will succeed with these secrets and therefore increase your win/loss ratio. These are advanced techniques with regard to the indicators we use. You won't find these nuances in any textbook! Increase your risk/reward ratio by identifying optimal low-risk entries on the “edge” of the market, and riding them for huge gains. Identifying these “sweet spots” allows us to enter a position before there is any confirmation and therefore way before the crowd. This provides a miniscule risk and fantastic potential reward.

TOPIC 9: “The Psychology of Trading”

Trading is more than just technical analysis and research. It is both academic and “athletic” in that it requires one to not only “know” things but also to “perform.” It is the biggest “mind game” you'll likely ever face. We will help you turn knowledge into performance by giving you practical solutions to the most common psychological challenges. Barry Burns' doctorate is in the field of the subconscious mind, hypnotherapy and NLP, and is therefore uniquely qualified to help you with the psychological issues of trading.

Barry Burns Real World Trading

TOPIC 10: "Your Trading Plan"

You'll create your own customized, personalized trading plan to take home and begin using right away. This will include which markets you will trade, what time frames you will trade and a complete program for taking you from wherever you are now, to wherever you want to go in your trading career. You'll be able to follow this step-by-step plan for months -- and even years, into the future. It will help keep you out of trouble and help you steadily progress in your trading skill.

WHAT YOU GET WITH THIS SEMINAR:

1. You will receive two 40 minute videos and a full-color manual to study before you attend the course. This will cover the basic information so we can cover more advanced material in the live sessions.
2. Follow-up support after you attend the course. You receive a free month in the **FuturesTalk** Live Trading room where Dr. Burns comments on the open and close of the market every day (Free offer only to those not already subscribed). This is where you can continue to interact with Dr. Burns and get your questions answered after the course is over.
3. Custom Indicators. All the indicators Dr. Burns uses will be provided to you.
4. 2 free weeks of follow-up videos delivered to your eMail address 3 times per week. Dr. Burns continues to give you insights into current market indexes, stocks and currencies through these instructional videos (2 free weeks available to those who are not already subscribers).
5. 2 free weeks of Dr. Burns' Chart Scans. You'll receive eMails with the results of his computer scans for the setups discussed in class (2 free weeks available to those who are not already subscribers).
6. A manual with the advanced teachings, illustrated with full color charts with room for notes (may be downloaded from the internet after the course begins).

All classes recorded and available for review from a password protected web site.

BIOGRAPHY

Dr. Barry Burns is president and owner of [Jaguar Trading](#) and the moderator of [FuturesTalk](#) Audio Trade Room where he guides listeners through the open and close of each trading day.

Dr. Barry Burns was a businessman who owned several small companies. His business background had taught him to focus on the bottom line, so when he decided to become a professional trader his study of the financial markets was for one purpose only: to make profits. He read over 100 books on trading and investing, and invested over \$50K in trading education.

Dr. Burns has been a headlining guest speaker for the Market Analysts of Southern California, given in-depth presentations at several Wealth Expos and Traders Expos nation-wide and been interviewed on Robin Dayne's "Elite Masters of Trading" Radio Show.

He is also a hypnotherapist and NLP practitioner, and therefore uniquely qualified to help people with the psychology of trading.

Special New Content: New Topics in 2006

Barry delivered his first five courses in 2005 to many satisfied students. These students follow him daily in FuturesTalk Trade Radio every day, twice a day. In 2006, the course contains a lot of new material. Included in the price of the course, are many proprietary indicators that currently work in Tradestation. Some may or may not be available for eSignal by course time.

1. Use of **Trading Bands** to highlight exceptional trades and to keep you out of trouble.
2. The use of **Contraction/Expansion Cycles**. Includes a **NEW Expansion/Contraction Cycle Indicator** that helps you know when trend follow-throughs are less likely (during contraction cycles). This new indicator also signals when contraction cycles are finishing and an expansion cycle is about to begin.
3. An advanced look at trend. Includes **NEW Trend Indicator** that *reacts much faster* to the market than the 50 MA.
4. How to read volume including a **NEW Volume Indicator** that even works on TICK charts.
5. Simplified Elliott Wave price patterns.
6. Identifying Swing Highs and Lows. **NEW Swing Indicator** (modification of prior indicator) that helps identify excellent entry points at Cycle Highs and Cycle Lows as well as Stop placement levels.
7. The advanced study of Fibonacci Time Cycles.
8. Advanced study of Fibonacci Support/Resistance Clusters
9. Advanced EIEIO entries and exits.

Last but not least: How to find stocks and indexes that are poised to outperform the market **before** they outperform, **before** everyone else's scans. Includes a **NEW Swing Trading Indicator**.

Proprietary Indicators [included with course]	
The Traders' Family of Indicators	
Name	Function
1.Mom [Momentum]	Mom indicates momentum of trend.
2.Dad [Direction]	Dad indicates direction of trend.
3.Oscar [Oscillator Stochastics]	Oscillator identifies trade setups.
4.Ceci [Commodity Channel Index]	CCI points to the trigger for trade entry.
5.Tick Counter	Counters track when to expect new bar.
6.Automated Floor Trader Levels	Point levels of support & resistance.
In the course you will learn how to apply and, more importantly, interpret these indicators.
